PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science and Engineering student (2027) with hands-on experience in full-stack web development, Generative AI, and data analytics. Built and delivered multiple full-stack and AI projects on my own as a freelancer, including AI-driven analysis tools, which gave me real, practical experience in building software from start to finish. Now looking to join a team where I can collaborate closely with experienced engineers, contribute strong fundamentals, and help drive projects to successful completion. Hardworking, adaptable, and ready to contribute as a Software Engineer, Full Stack Developer, or AI/ML Engineer.

EDUCATION

B.Tech — Computer Science and Engineering Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai	Aug 2023 – Jun 2027 CGPA – 8.37
Board of Intermediate Education — MPC FIITJEE Jr. College, Vizag	Jun 2021 – Mar 2023 Percentage – 77.4
Board of Secondary Education Tirumala E.M High School	Aug 2020 – Apr 2021 Percentage - 100

TECHNICAL SKILLS

Programming Languages: C, Python, Java, SQL

Databases & Web Development: MySQL, PostgreSQL, MongoDB, HTML, CSS, REST APIs

AI, Cloud & DevOps: OpenAI API, LLM Integration, Prompt Engineering, Agentic AI, Docker, Git, GitHub, n8n, AWS & GCP (Basics)

Computer Science Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Software Engineering, SDLC, Natural Language Processing (NLP).

Professional & Design Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Leadership, Adaptability, Time Management, Canva, Figma

WORK EXPERIENCE

AI Developer Intern — Seventh Horse Agri-Tech Private Limited (MATIC), Chennai	Jun 2025 – Oct 2025
- Developed AI-powered enterprise applications, including a GenAI-based Task Management System and an OCR-powered Expense Analytics Platform, to automate employee task management, workflow automation, financial tracking, and business operations. - Built a conversational AI assistant using LLMs, Prompt Engineering, REST APIs, and SQL, along with an OCR-based document processing system using Java and MySQL to automate invoice scanning, transaction categorization, expense analytics, and real-time reporting. - Collaborated with the development team in Agile sprint reviews, applying Git, GitHub, REST API integration, and SQL database management to deliver scalable and maintainable AI-driven solutions.	

PROJECTS

GenAI-Powered Assistant & Automated Task Management System — Python, LLM, Prompt Engineering, REST API, SQL

- Developed an **AI-powered enterprise task management platform** to streamline company operations through intelligent **employee task assignment**, **workflow automation**, **project tracking**, **approval management**, **role-based access control**, and **real-time monitoring**.
- Built a **conversational AI assistant** using **LLMs**, **prompt engineering**, **REST APIs**, and **SQL** to automate workflows, understand **natural-language requests**, manage employee and project data, generate reports, and improve **operational efficiency**.

TrackWise — Expense Analytics Platform — Java, C++, MySQL, OCR, REST API, HTML

- Developed an **AI-powered expense and financial analytics platform** to simplify business expense management by automating **bill and invoice processing**, **transaction tracking**, **financial analysis**, and **performance monitoring**.
- Built an **OCR-based document scanning system** to extract invoice data, categorize transactions, store records in **MySQL**, and generate **dashboards** for income, expenses, profits, losses, **vendor analytics**, spending trends, and **financial reports**.

IoT Smart Agriculture System — Python, Raspberry Pi, REST API, Cloud

- Developed an **IoT-based smart agriculture platform** to monitor **soil moisture, temperature, humidity, rainfall, water level, NPK nutrients**, light intensity, and environmental conditions for **intelligent crop management**.
- Integrated **Raspberry Pi** with **IoT sensors, cloud dashboards, automated irrigation control, real-time alerts, and remote monitoring** to optimize water usage, improve **crop productivity**, and support **data-driven farming**.

OmniRoot Agentic AI — Autonomous Infrastructure Intelligence Platform — Python, OpenAI API, n8n, SQL, Docker

Live Demo: <https://omniroot-agentic-ai.vercel.app>, **GitHub Link:** <https://github.com/Vamsi112-max/OmniRoot-AI>

- Developed an **enterprise AIOps platform** to automate **infrastructure monitoring, incident detection, root cause analysis, API debugging, cloud cost optimization, security monitoring, and intelligent remediation** using AI agents.
- Built an architecture with **5 specialized AI agents, 8 intelligence layers, and an 18-node n8n workflow**, integrating **OpenAI APIs, SQL, Docker, FastAPI, and REST APIs** to automate **incident analysis, alert prioritization, governance reporting**, infrastructure monitoring, and remediation.

AtomSphere Nexus — Goal Intelligence & Performance Tracking SaaS Platform — React.js, Supabase, SQL, REST API

Live Demo: <https://atom-sphere-nexus.vercel.app>, **GitHub Link:** <https://github.com/Vamsi112-max/AtomSphere-Nexus>

- Developed a **multi-role SaaS platform** to streamline **employee performance management, goal tracking, project monitoring, KPI evaluation, review cycles, and organizational analytics** through a centralized management system.
- Built **role-based dashboards** for Employees, Managers, and Admins using **React.js, Supabase, SQL, and REST APIs**, enabling **real-time synchronization, performance insights, automated reviews, PDF/Excel report generation, and secure data management**.

CERTIFICATIONS & ACHIEVEMENTS

- **2nd Place — Smart India Hackathon (SIH)**, University Level.
- **3rd Place — IIITDM Innovation Bootcamp Cybersecurity Challenge**.
- **Hackathon Participant & Certifications:** Amazon HackOn 6.0, AtomQuest 2026, Google Gemini Write-off, Agentic AI Hackathon, IndustriAI 24-Hour Hackathon, Aurigo, Infosys, Smart India Hackathon(SIH).

ACHIEVEMENTS:

- Registration & Onboarding Lead — **Yantriksha X Hub**, Vel Tech University.
- Creative Design & Visuals Head — **Just Between Us Town Hall**.
- Represented and coordinated at **EDII for the Tamil Nadu Government** funding program.
